

A Scientifically Backed Way to Reduce Pain

Also known as **Photobiomodulation** (PBM), light therapy uses specific wavelengths to activate the body's own healing mechanisms.

The gentle light energy is absorbed by **mitochondria** in your cells, boosting energy (ATP) and triggering repair in muscles, skin, and nerves.

"PBM significantly shortened wound-healing time - even in chronic cases unresponsive to standard care."

— Degerman et al., 2022
(PLOS ONE)

Two Wavelengths. One Purpose — Healing

- **635 nm red light** - acts on surface and soft-tissue layers to calm inflammation, stimulate micro-circulation, and promote new tissue growth.
- **810 nm infrared light** - penetrates deeper to relieve nerve irritation, muscle tension, and joint stiffness.

Clinical studies show these wavelengths:

↑ **Cellular ATP production & oxygenation.**
(*J Biophotonics*, 2023)

↓ **Inflammatory markers.**
(*Clinical Laser Therapy Journal*, 2023)

↑ **Collagen & tissue repair.**
(*Wound Repair & Regeneration*, 2021)

Shorter hospital recovery times.
(*Neto et al.*, 2023)

"Dual-wavelength PBM enhances regeneration and reduces pain without pharmacological side effects."
(*Clinical Laser Therapy Journal*, 2023)

MedWave™

LIGHT THAT HELPS YOU HEAL

Introducing our Revolutionary

Narrow Light Technology™

Pain shouldn't slow you down. Narrow Light Technology™ uses clinically proven red and near-infrared light to ease discomfort, calm inflammation, and support faster wound recovery - naturally.

Drug-free

Non-invasive

Safe for all ages

Who It Helps

CLINICALLY USED FOR:

- Chronic muscle or joint pain
- Tendon and nerve inflammation
- Post-surgical or trauma wounds
- Diabetic foot ulcers & pressure injuries
- Sports or work-related injuries
- Slow-healing cuts & scars

“PBM increased collagen formation, reduced infection risk, and improved wound closure rates.”

(J Biophotonics, 2023)

TRUSTED BY:

Doctors, nurses, and rehabilitation specialists worldwide.

Faster Healing. Less Pain. More Comfort.

1,700+

clinical studies confirm the effectiveness of red and infrared light in pain management, inflammation control, and tissue regeneration.

MedWave™ Narrow Light Technology™ turns that research into safe, everyday care — helping you move, heal, and live better.

MedWave™

FOR RELIEF YOU CAN FEEL

- ✓ REDUCES INFLAMMATION & SWELLING
- ✓ EASES JOINT AND NERVE PAIN
- ✓ ACCELERATES TISSUE & WOUND REPAIR
- ✓ IMPROVES CIRCULATION & OXYGEN SUPPLY
- ✓ SUPPORTS POST-SURGICAL RECOVERY

Treatments are gentle, warm, and comfortable — with no needles, no medication, and no downtime.
