@durbanneurolaserclinic

A reduction of up to 12 cm in your first session & up to 23 cm after just 3 sessions with MedWave™ is the norm

"It feels like it goes deeper than other red light machines. It helps with my pain, and I've lost centimeters in just a few sessions!"

L. Branson

WE TYPICALLY SEE OUR CLIENTS LOSE 28 CM IN 7 SESSIONS & 33 CM IN 8 SESSIONS

01

The targeted wavelengths of red light relieve pain and promote healing.

02

Narrow Light™ Technology mobilizes fat out of the fat cells, converting it into energy.

03

This fat is then easily burned with just 5 minutes on the vibration plate before and after your light session, which is as effective as an intense gym workout.

04

Additionally, Narrow Light™ Technology promotes the removal of harmful substances in your system and in the fat cells.
